Disclaimer

These applications are not intended to replace therapy with a speech-language pathologist or instruction from a sign language teacher/professor/interpreter. Use only under direction of a speech-language pathologist or other qualified therapist/professor/interpreter. None of these applications were created by Consonantly Speaking; therefore, any difficulties or complaints with each application should be directed to the developer of that specific application. Consonantly Speaking does not have any bearing on how the application will work and has not used all of the applications on the list. Consonantly Speaking does not specifically endorse or recommend any of the following applications over others. This list is intended as a compilation of applications that can be used with or by a speech-language pathologist, interpreter, therapist, or professor for learning and using sign language to communicate. Applications are not listed in any specific order other than by category. The prices of the applications are subject to change or sale by the developer at any given time. A reference list that helped make this list possible can be found at:
